DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Eftechiou (6,002,747).

Consider claims 10 and 21, Eftechiou teaches a method and arrangement for detecting a first communication device connected to a subscriber line, comprising: examining a transmission function of the subscriber line for a deviation (col. 3 lines 10-15; col. 7 line 53 – col. 8 line 26); and indicating detecting the first communication device if the deviation exceeds a threshold value (col. 3 lines 16-27; col. 8 lines 44-67; it should be noted that the alarm circuit provides both visual and audible indications).

Consider claim 11, Eftechiou teaches the claimed feature (col. 9 lines 23-30).

Consider claims 12 and 13, Eftechiou teaches the claimed features (col. 7 line 53 – col. 8 line 26).

Consider claims 14 and 17, Eftechiou teaches the claimed feature (see Fig. 1).

Consider claim 18, Eftechiou teaches wherein when the first communication device is a monitoring device (i.e., eavesdropping or wire-tapping device) (col. 8 lines 45-46).

Consider claims 15 and 19, Eftechiou teaches wherein information is transmitted between the second and third communication device according to an xDSL transmission (i.e., data transmission) method (col. 11 lines 10-15; col. 15 line 66 – col. 16 line 1).

Consider claims 16 and 20, Eftechiou teaches wherein the examining is carried out by an xDSL modem assigned to the first and/or second communication device (col. 11 lines 10-15; col. 15 line 66 – col. 16 line 1).

Consider claim 22, Eftechiou teaches wherein a first and second communication device is connected to the subscriber line for transmitting information (col. 9 lines 23-30).
